Instructions

Read all instructions and requirements first

This assignment will be done as a group and only one person needs to submit it to Learn/Canvas

Create Multiple VMs: Use any VM creation tool that gives you root access and persistent storage

VirtualBox, Multipass, cloud (Amazon, Google, Azure, etc) (Docker won't be an option here)

Create a hostname relevant to the assignment (i.e., `test-<ucid>-<group_name>`)

Create a user of your ucid with a password, ensure relevant permissions

Hardware: 1GB Memory, 10GB Hard Drive

Install a server version of linux (i.e., Ubuntu Server 24.04)

Each group member should have at least 1 VM for this assignment (can be deleted later)

Hint: Use TailScale or ZeroTier

Get the sample code from the `main` branch at <https://github.com/MattToegel/IT490-2026>

Connect across each VM (each team member should get this working)

Run the `RabbitMQServerSample.php` file successfully in one instance

Run the `RabbitMQClientSample.php` file successfully in another instance

Proper data should be sent/received

Create `setup-client.sh` and `setup-server.sh` scripts that automate the respective installation/setup logic

This should include necessary changes for cross-vm communication

Create a branch in the format of `module02-group-practice` in your team's repository (provided by the instructor)

Upload the content of the two scripts and the `composor.json` to it

Fill in the below requirements

Submit and Export once done

Upload the PDF to the branch you created above in your group GitHub repo for the class

Create and successfully merge a Pull Request to the primary branch of your group's repo (i.e., `main`)

Upload the PDF to Canvas

You may delete the test VMs

Create and successfully merge a Pull Request to the primary branch of your group's repo (i.e., `main`)

Upload the PDF to Canvas

You may delete the test VMs

Submission Progress

100%

Section #1: (7 pts.) Example Solution

100%

Section #2: (3 pts.) Reflection

100%

End of Assignment — make sure you click **Submit**.
